Introduction to Micad Analytics Centre

This guide relates only to Micad Analytics Centre.

This guide offers an overview of the key features in the latest version of the Micad Analytics Centre. We've introduced a new application launcher, called HUB, which is a multi-tenant service providing all clients with access through a single web URL. The interface has been upgraded to the next-generation User Interface (UI) to ensure consistency across all MicadPro applications.

As the application evolves, this document will be updated accordingly. A detailed log of new features and fixes for each iterative release can be found on the final pages.

What is MAC

Micad Analytics Centre (MAC) is a central platform for creating, accessing and sharing comprehensive dashboards that summarize and visualize data across MicadPro. It enables collaboration with partners and service providers in a read-only format. The dashboards are accessible by desktop PC and mobile devices. Dashboards can be private, public, or shared with specific users, depending on user roles.

What's new in MAC

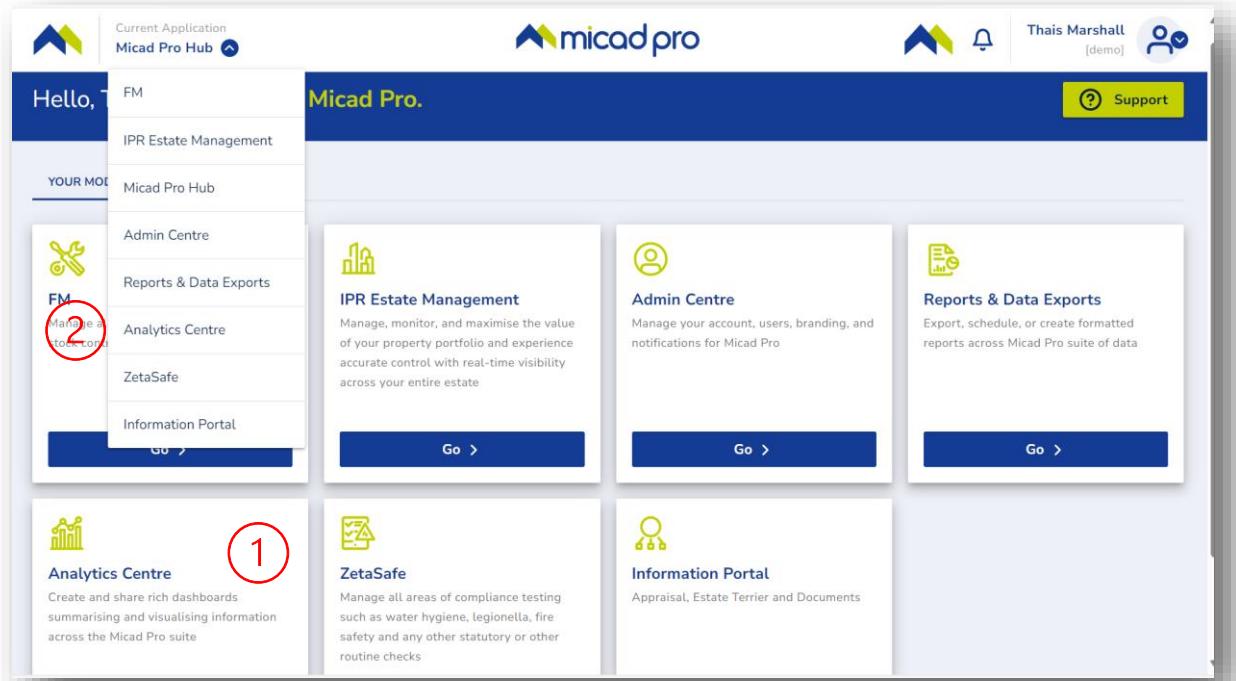

1. New technology many legacy limitations are removed
2. Unified 3rd generation UI
3. Unified centralised security 'Single Micad' login and SSO
4. Multi tenancy architecture
5. New flexible URL structures facilitate sharing and integration with third parties
6. Superior and more durable backend infrastructure

Micad Analytics Centre

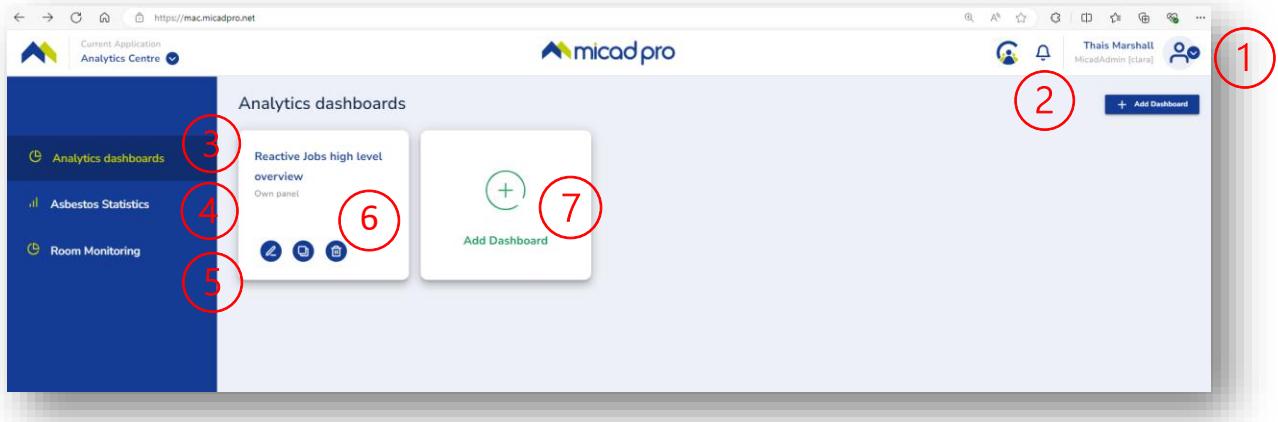

Accessing MAC

Access MAC through Micad HUB by:

1. Selecting 'Analytics Centre' tile,
2. or changing the current application to 'Analytics Centre'

MAC homepage

1. Current user account login, access to user details and to 'About' page with release date and product version.
2. MAC notification feature.
3. MAC dashboards.
4. Direct link to the Asbestos reports.
5. Room Monitoring dashboard.
6. Existing MAC dashboards.
7. Option to create a new MAC dashboard.

Create a dashboard

When selecting 'Add dashboard', the user will be prompted to enter the title of the new dashboard.

Once created, the user can choose to edit, duplicate or delete the new dashboard.

To access the dashboard and add charts/graphs, click on the desired dashboard, then the 'Add widget' option.

A pop-up window will appear displaying all the available widgets based on the client's licenses. You can use the search function to quickly locate a specific widget. After selecting a widget from the list, a preview of the widget will be shown, giving you a clear view of its appearance.

Once you've identified the desired widget, simply click 'Add Widget' to include it in the dashboard.

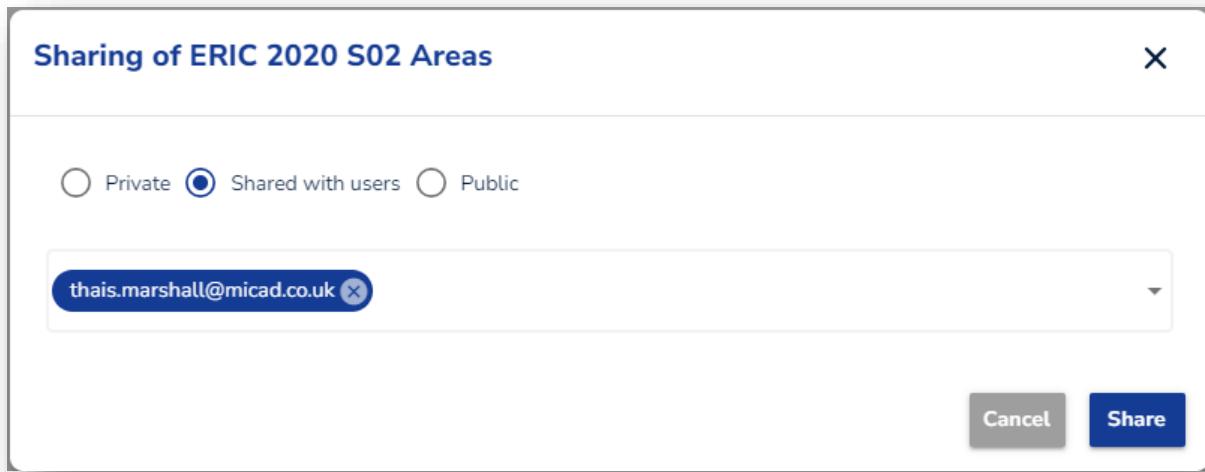

Widgets can be easily rearranged by dragging and dropping (1), resized (2), refreshed to update the data (3), and customized through the configuration settings (4). In the configuration menu, users can apply filters and update the chart title with ease.

A new feature allows users to apply a global location filter (5) that affects all widgets across the entire dashboard.

In the top-right corner, users have the option to duplicate, share, or delete the dashboard (6). The screen below displays the sharing options: selecting 'Private' makes the dashboard visible only to you, 'Public' allows everyone on the system to view it, and 'Shared with users' allows you to specify individuals by **email**. Those added will receive a link to access the dashboard.

Drill-down

Some widgets provide drill-down options, allowing users to view additional details about the data, including links to the location details page.

Multi-instance Charts

The screenshot below demonstrates that you can display multiple instances of the same chart on a single dashboard, with each instance presenting different data.

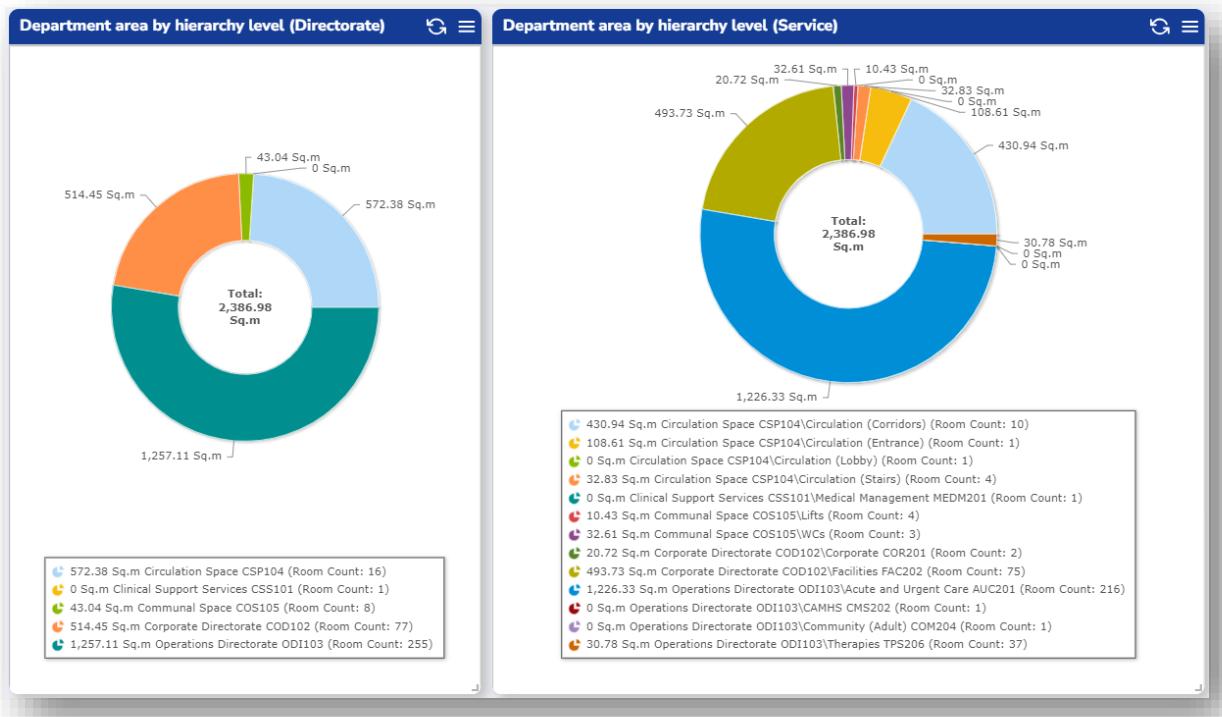

Chart categories

There are the various types of charts you can add to your dashboard, all of which are fully customizable. The types of charts available to you will depend on the modules you have access to.

Currently, there are six chart categories:

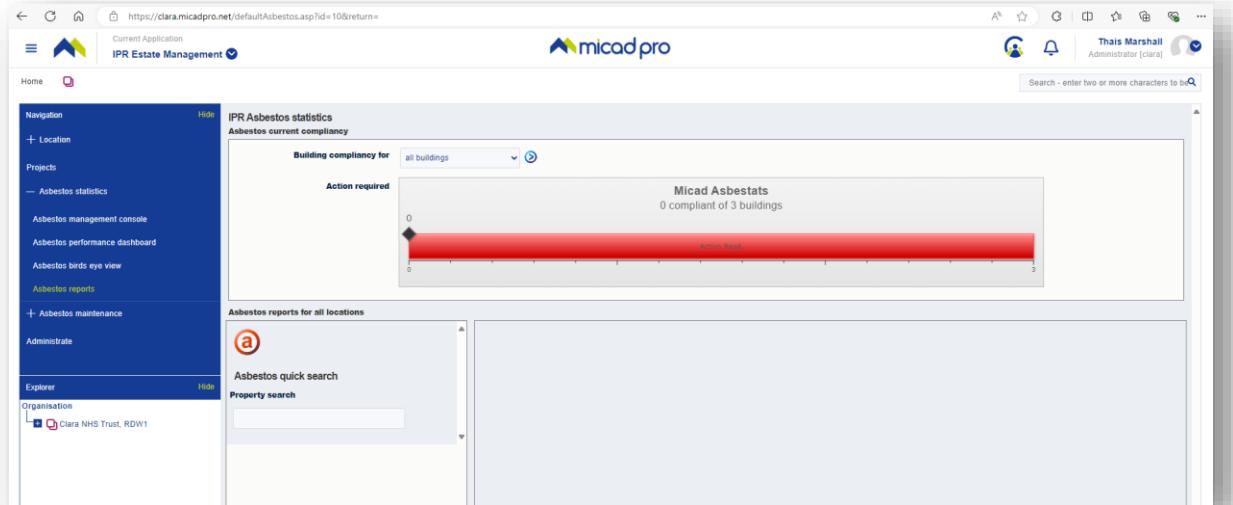

- Core Charts (10)
- Appraisal Charts (4)
- Capital Planning Charts (30)
- Compliance Charts (12)
- Help Desk Charts (18)
- Audit Charts (8)

Dashboard example

Asbestos Statistics

In the left-hand menu, the 'Asbestos Statistics' option offers a direct link to the Asbestos reports page.

Room Monitoring dashboard

If a user has access to the RUM 2 application, they will see the Room Monitoring option in the left-hand menu. Upon selecting it, the user is presented with a read-only interactive view of the Room Monitoring dashboard, which consists of three tabs:

- Room Booking Portfolio Overview

- Attendance
- Utilisation

These tabs can be accessed by scrolling down the page.
